How do you minimize maintenance and repair costs while improving reliability and safety?

Introducing The Spartan Hydrant®

Completely Redesigned and Reengineered the Spartan:

- Opens Quicker and Easier than Standard Hydrants
- Keeps Unauthorized Personnel from Accessing the Hydrant
- Dramatically Reduces Chance of Leaks and Freezing in Winter
- Parts Like Caps, Nozzles, Stems Will Not Rust, Seize or Corrode Even in the Harshest Environments.

Built using Exceptional Anti-Corrosive Materials the Spartan Reduces:

- Money Spent on Expensive Replacement Parts
- Labor Costs for Painting and Repair
- Water Loss from Leakage and Theft
- Accelerated Wear and Tear from Weather and Repetitive Use

Maximize the Return on Your Investment. The Spartan hydrant:

- Built Using Rugged Ductile Iron Coated with Ultra Durable Thermoset Powder Coating
- Internal Parts Made from Stainless Steel
- Patented Reengineered Lower Valve and Drain System
- Built-In Security Features Allows Access by Authorized Personnel Only

SPARTAN
FIRE HYDRANTS

The Spartan fire hydrant is also backed by a 25-year warranty; the only one of it's kind in the industry.

"We completed an exhaustive review of this hydrant along with our fire department and decided that the many improvements in design were of value to us all. These along with the modern styling and built in security solutions resulted in our decision to standardize on the Sigelock for all future installations."

Jeff Trezza Manager T&D Veolia Water, NY

"I have been using Spartan hydrants at Scott Air Force base since November 2012. I am very impressed with the ease and speed of access to these hydrants as well as the quality of materials and design. They are very easy to operate and provide a significantly improved flow rate over the other hydrants in my system. I would recommend the Spartan to anyone looking to improve the reliability, durability and security of their fire hydrants."

American Water - Scott Air Force Base
34605 Arkansas Street | Scott Air Force Base, IL

"Since installing the Sigelock Spartan hydrant in 2011, its performance has far exceeded my expectations. In 3 years, the hydrants have endured the harsh conditions of super storm Sandy and two extreme winters; never once seizing, rusting or freezing which often occurred with older style hydrants. The Sigelock hydrant has operated flawlessly in safeguarding the public and has also presented a cost savings to taxpayers."

Superintendent, Water Transmission City of Long Beach
